

AllView OTT

Team Description

- This project was driven by a collaborative team with specialized roles to ensure its success. The **Data Engineer** architected and built the end-to-end ETL pipeline using a custom framework, integrating structured and semi-structured data sources while implementing SCD Type 2 for historical tracking. The **Business Analyst** derived strategic insights, identifying high-ROI content, target demographics, and regional opportunities to guide the platform's launch strategy. The **Data Analyst** developed an interactive analytics dashboard, transforming complex data into actionable KPIs and uncovering trends like optimal release timing and audience engagement patterns. Together, the team combined technical expertise with business acumen to deliver a data-driven foundation for the OTT platform's success.

Team Members
